Join Our Innovative Team as a Technology Manager

Are you a tech-savvy leader passionate about shaping the future of education? Bertschi School is looking for a dynamic Technology Manager to join our team and drive the technological vision of our school. As the Technology Manager, you'll collaborate with our leadership team, manage a talented support staff, and ensure that our technology infrastructure supports both educational programs and administrative functions.

What We Offer:
- Competitive salary ($105k to $125k) based on your experience and qualifications.
- Comprehensive benefits package, including excellent health insurance, 6 weeks of paid vacation, and a robust retirement plan.
- The chance to make a real impact in a vibrant, inclusive, and supportive community.

About Us:
Bertschi School, located in the heart of Seattle, is dedicated to educating children to become compassionate, confident, and creative learners in a global community. We value diversity, integrity, and social responsibility, and we're committed to sustainability.

Your Role:
As the Technology Manager, you'll:
- Oversee and manage the school's technology budget, infrastructure, and vendor relationships.
- Lead technology planning and implementation to support our mission.
- Provide expert guidance and training to staff and students.
- Play a key role in upcoming campus planning and expansion projects.

What We're Looking For:
- A Bachelor's degree in computer science, technology, or a related field.
- 5+ years of experience managing technology and network functions, preferably in a school setting.
- Expertise with an Apple environment, Google Workspace, and network management.
- Strong problem-solving and communication skills.

Ready to bring your skills to a school that values innovation, collaboration, and growth? Apply now to join our team and be part of something extraordinary.

Application Process:
Interested candidates should send a resume, cover letter, and application to
